- MH - Mr. Mukhtar Hussain
- LM - Mr. Luz Mirafuentes

Points	Action By	Deadline
<p>“WASTE NOT, WANT NOT”.</p> <ul style="list-style-type: none"> ● Cast your vote HIAB post Ramadan Campaign ● Please read participants ideas. ● Choose 1 best idea and cast your vote by writing your name and the letter of participant (i.e. Name, Participant “X”) ● Drop in the box your entry. ● Winner will receive a Dinner Gift Voucher <p>1. Participant “A” “Waste Not, Want Not” HIAB Ramadan Campaign 2017</p> <ul style="list-style-type: none"> •Wilful waste makes woeful want – It means you willfully waste money, food, valuables, time, energy, etc. in the present moment, and then you may get into a situation when there is shortage of supply of such things. •Renewable and non-renewable resources - Non renewable as the word itself states that it is a depleting source as we go on using we should keep resources for over upcoming generation. •Labels Coax and filcher – Labelling switches is a good way to ensure employee do not switch off unnecessary lights and appliances the idea is to help employees do the energy conservation. <p>2. Participant “B” “Waste Not, Want Not” HIAB Ramadan Campaign 2017</p> <p>Waste Management Use Both Sides of Paper: Use both sides of papers when printing, photocopying and faxing. This way, you can reduce paper cost and paper use in your office. This is a good way to lessen paper waste generation as well. Energy Management Install Occupancy Sensor Lighting: Consider installing motion or occupancy sensor lighting in conference rooms, bathrooms, storage</p>	All	

cupboards, the warehouse, the plant or other areas that are not used continually. Water Management Go Low-Flow: In whatever purpose you use water; make sure the showers, taps, and faucets are outfitted.

3. Participant "C" "Waste Not, Want Not" HIAB Ramadan Campaign 2017

The meaning of the phrase, 'waste not, want not' means that: "if you don't waste money and other vital resources in your present moment, then you will never fall short of it in the future." Best practices we do in order not to waste money, food, electricity, water and how to manage waste:

1. We keep the food in the refrigerator in a proper container and store it properly.
 2. We keep the Air-condition off in the room or living room, if no one is in the area.
 3. We separate used plastic bottles and keep in the recycle bin near our accommodation (behind Building 23).
 4. We recycle plastic bags from shopping and use as your garbage bag.
 5. We plant the seeds of lime, oranges, avocados and dates, served as indoor garden and we replant the green onions and lettuce in a plastic indoor planters.
- "Waste Not, Want not" tells us to be a good stewards.

4. Participant "D" "Waste Not, Want Not" HIAB Ramadan Campaign 2017

"The less we waste, The less we lack in the future"
When people distort the truth, they squander their credibility. When governments waste resources, they squeeze valuable programs. When start-ups squander opportunities, they cloud their future. When generals lose focus, they jeopardize the mission. When role models act dishonorably, they damage their reputation. When executives increase red tape, they stifle creativity and innovation. When coaches forget discipline, they lose games. When grown-ups deflate a kid's confidence, they stymie potential. When people waste money, they shouldn't complain about having too little.

5. Participant "E" "Waste Not, Want Not" HIAB Ramadan Campaign 2017

Rethink our consumption needs: After huge purchases, we find out that most of the products don't make us as happy as we thought they would. In going about our life experiences, we should reconsider our consumption habits and also buy

<p>what we think is necessary and useful for the betterment of both our well-being and nature. Reuse products: Reusing the products that we have already bought keeps them away from the landfill. Recycling is one of the best solutions for landfill management. Self Discipline: One of the best things we can do is to have Self Discipline. Everything that happens in this world can be blamed on us because we destroy nature. All we can do is stop the wrong things we do against nature</p> <p>6. Participant “F” “Waste Not, Want Not” HIAB Ramadan Campaign 2017</p> <p>To control waste: Always recycle the pages instead of throwing in the bin, Don't waste food take as much you will eat because daily 4 million people don't get proper food, Green bin for foods, Red bin for glasses and plastic, Yellow bin for papers it also should implement in HOLIDAY INN AL BARSHA and at home To control energy :Do not waste energy its very important resource for us and for our coming generation. Always switch off the lights in home and company if it is not in use, Don't go for a cheap go for best which is certified by ISO, Use LED lights, We should keep solar system in our property which will give natural energy To control water : Water is the main resource for which we are facing problem in a daily base even all the countries fighting for this only, As we all know in Dubai there is less water so control before its get over, Always close the tap while shaving and brush, Don't use shower try to use bucket for bath,, If less dress for wash don't use washing machine better to wash by hand, Last water water everywhere but nor a drop to drink</p>		
<p>Drive recycling champion</p>	<p>George</p>	
<p>Analysis of submitted idiom of all participant</p>	<p>All</p>
